C12.3c

(C12.3c) Enter the details of those trade associations that are likely to take a position on climate change legislation.

**Trade association**
Confindustria and some associated associations (such as AssogasLiquidi, Assoseco, Anigas).

**Is your position on climate change consistent with theirs?**
Consistent

**Please explain the trade association's position**
Confindustria is strongly committed to promote actions related to climate change, always taking into account the economic sustainability of emission reduction targets and of the initiatives to be implemented. Confindustria is a key advisor for the Italian Government on the definition of the national energy policy. These groups prepare position papers addressed to the Ministry to transfer the technical know-how needed to draft specific legislations or to improve the existing one.

**How have you influenced, or are you attempting to influence their position?**
Snam is directly involved in some of Confindustria’s working groups related to climate change issues, such as "Energy efficiency", "Emission trading" and IED (Industrial Emission Directive). Snam endorses mechanisms which favour an increase of emission allowance prices. Snam also supports the EU Parliament proposal for an Emission Performance Standard (EPS) to be introduced in the Modernisation Fund foreseen by the ETS Directive.
