American Clean Power Association (ACP)

ACP represents a broad cross-section of the USA’s clean energy industry, including land-based and offshore wind, solar, transmission, and storage companies, manufacturing and construction businesses, developers and owners/operators, utilities, financial firms, and corporate purchasers.[1] ACP states that its goal is to make clean energy the dominant electricity source in the USA.[2]

**Membership of board/executive committee:** Shell is a member of the board of directors.

---

**2022 assessment outcome:**
- **Aligned**

**2021 assessment outcome:**
- **Not reviewed**

---

**Summary**

Shell benefits from its membership of ACP, in particular its role in uniting the diverse renewable energy industry behind common goals such as modernising the US power grid and facilitating key technologies such as offshore wind.

We welcome ACP’s leadership and advocacy in relation to the deployment of funding and incentives made available through the Infrastructure Investment and Jobs Act of 2021 and the Inflation Reduction Act of 2022.

We have found ACP to be aligned with our climate and energy transition-related policy positions.
We will remain a member of ACP. We will continue to engage the association on climate and energy transition-related topics. We will continue to track alignment between ACP’s climate and energy transition-related positions and our own.
