Highlighting some of our global coalition memberships

Nestlé advocates for positive change through various industry and other types of coalitions to act on climate change and scale our impact. This includes our membership of:

- **Taskforce on Nature-related Financial Disclosures** – we are an active member of the taskforce’s working group, which is aimed at advancing the collective understanding of how to report risks and dependencies on the natural environment.

- **The Business Coalition for a Global Plastics Treaty** – we supported the launch of this group, which is seeking a legally binding United Nations Treaty on Plastic Pollution, in 2022.

- **The World Economic Forum’s Alliance of CEO (chief executive officer) Climate Leaders** – Nestlé’s CEO supports the actions of this group which seeks to catalyze action and initiatives from companies across industry sectors.

- **One Planet Business for Biodiversity (OP2B)** – Nestlé is a founding member and leads work boosting biodiversity and stopping deforestation through changes to the way ingredients used in our products are sourced.

- **CGF Forest Positive Coalition** – Nestlé is founding member of the Coalition, launched in 2020. It is focused on removing deforestation, forest conversion and degradation from key ingredient supply chains and supporting businesses that have a regenerative effect on critical forest ecosystems.

- **Natural Climate Solutions Alliance** – Nestlé supports the ambition of the Alliance in helping create the right conditions for a functioning market where companies can invest in high-quality projects that deliver rapid drawdown of carbon from the atmosphere.

- **International Chamber of Commerce Environment and Energy Commission** – Nestlé actively participates in the Commission’s efforts to develop policy recommendations and tools that address environmental challenges like climate change.
The World Business Council for Sustainable Development Working Groups – Nestlé participates in a number of groups, including SOS 1.5 (https://www.wbcsd.org/Programs/Climate-and-Energy/Climate/SOS-1.5), aimed at limiting global temperature rises to 1.5-degrees Celsius, and the Climate Policy Working Group (https://www.wbcsd.org/Programs/Climate-and-Energy/Climate/Climate-Action-and-Policy), as well as participating in discussions around nature and plastics.

- Exponential Roadmap Initiative (https://exponentialroadmap.org/) – in December 2020, Nestlé joined the Initiative as a Supply Chain Leader, working with suppliers to move towards the 1.5-degrees Celsius, net-zero pathway. Nestlé also supports the SME Climate Hub (https://smeclimatehub.org/), where smaller companies can find advice and support to transform their own business models.

- CEO Water Mandate – we are members of this United Nations Compact initiative, uniting business leaders around Sustainable Development Goals around water and sanitation.

- WASH4WORK – Nestlé is a member of this initiative, which asks businesses to take action to address access to safe water, sanitation and hygiene in their own operations and supply chains.

- Alliance for Water Stewardship – Nestlé is a member of the Technical Committee and Agricultural Working Group, as well as contributing to the work of the AWS (Alliance for Water Stewardship) board.
